SUMMARY

Entry-level Software Developer with internship experience working on real-world web applications and systems. Skilled in Java, Python, HTML, CSS, and JavaScript, with hands-on exposure to databases, UI/UX fundamentals, and modern development tools. Quick learner with a strong problem-solving mindset, seeking a developer role to contribute, learn, and grow across full-stack or backend-focused projects.

EDUCATION

Savitribai Phule Pune University <i>Master of Science in Computer Science; CGPA: 8.4/10</i>	June 2025 Pune, India
Punyashlok Ahilyadevi Holkar Solapur University <i>Bachelor of Science in Computer Science; CGPA: 9.24 /10</i>	June 2023 Akluj, India

PROFESSIONAL EXPERIENCE

Web Development Intern — WordPress Site Management (Professor’s Website) (Remote)	2025 – Present
- Managing and maintaining a professor’s WordPress website with regular updates and performance reliability. - Designing and restructuring pages using WordPress, HTML, CSS, and block editors while improving UI and responsiveness. - Updating academic content, posts, resources, and forms in coordination with the professor.	
Web developer intern (Remote) Universidad Maria Auxiliadora.	October 2024 – February 2025
- Built responsive websites using HTML, CSS, JavaScript with improved UX and accessibility. - Implemented interactive features and optimized site performance. - Collaborated with the university team to align designs with functional needs.	
Web developer MasterTej	Feb 2023 – May 2023 Akluj, India
- Designed responsive websites using WordPress and Webflow. - Customized themes/plugins and optimized performance for better UX. - Delivered projects on time, ensuring quality	

PROJECTS

1. Lightweight Detection of Cloud Resource Deviations	Nov 2024 – Feb 2025
- Developed an anomaly detection system using the Isolation Forest algorithm. - Monitored CPU, memory, and network metrics in real time with 88% precision. - Enhanced cloud resource management by reducing costs and optimizing resource utilization. Technologies: Python, Machine Learning.	
2. Water Jar Distributor Management System	Jan 2023 – May 2023
- Desktop application for tracking daily jar sales and transactions using C# and MySQL. - Implemented features for real-time inventory updates, automated transaction logging, and report generation. - Enhanced operational efficiency and streamlined record-keeping. Technologies: C#, MySQL, Windows Forms, Visual Studio	

TECHNICAL SKILLS

Frontend:
HTML5, CSS3, JavaScript, Responsive Design, Bootstrap
Programming Languages:
Java, Python, C#
Version Control:
Git, GitHub
CMS & Website Builders:
WordPress, Webflow
Cloud & Tools:
AWS (basic cloud concepts, deployment awareness), Docker (basic usage)
Other:
Basic web application structure understanding, clean code practices
